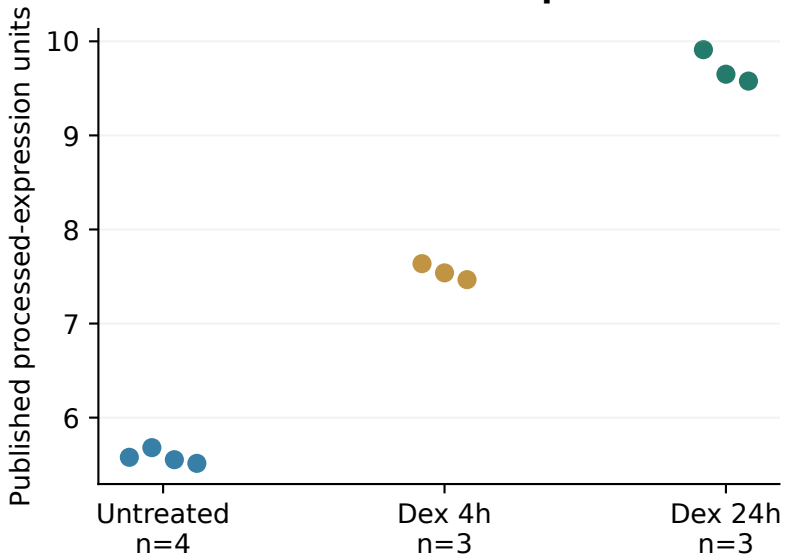
A Discovery and frozen candidate

airway / GSE52778: 4 paired donors
Full DESeq2 results; padj < 0.05, log2FC > 1

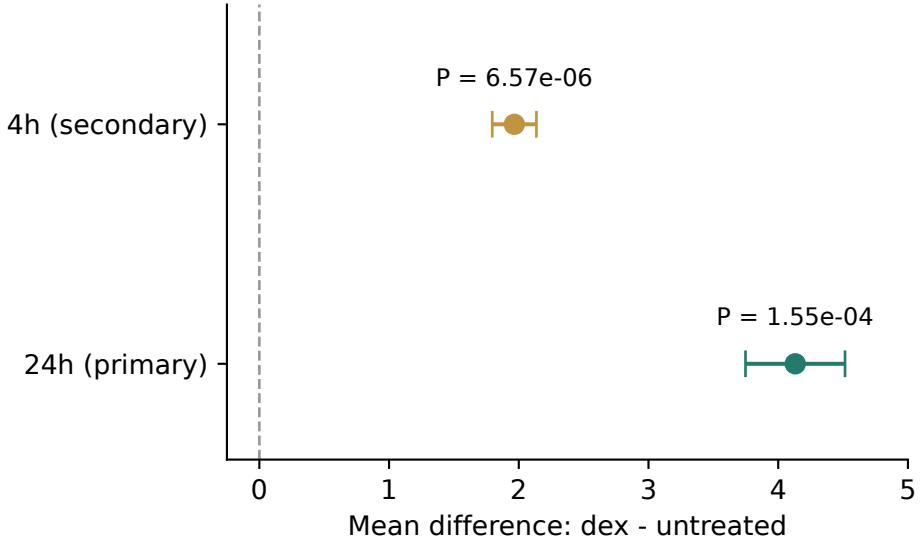
Rank by padj, then feature ID
First candidate: SPARCL1 / ENSG00000152583

Discovery log2FC = +4.575
Freeze before candidate-expression testing

B All external culture replicates



C Predefined contrasts and Welch CI



D Evidence and next experiments

External experiment: GSE34313 / GPL6480
One HASM1 cell line; culture replicates
Not an independent-donor cohort

Primary permutation P = 1/35 = 0.02857
Expression response: preliminarily replicated
Mechanism / protein / clinical effects: untested

Next: new donors, GR perturbation,
SPARCL1 intervention and matrix endpoints
